Mockup Review Notes
Creative Director: Neema S
Designer: Maddy M

Home Page
- Simplicity of home page works really well with the full-page background image
- Navigation bar – try different variations such as:
  - Moving to bottom
  - Making it one bar instead of four
  - Remove boxes and make text white
  - Circles instead of boxes

Content Pages
- Make the layout for the content pages different from the home page
  - However, keep the aesthetic consistent enough between home page and content pages to make the site feel cohesive
- Incorporate more content
  - Subheadings underneath each tea
  - Scrolling to read more – could have the text go all the way down the page or keep everything fixed and scroll within the box
    - With the second option, make it clear that the text can be scrolled through

Images & Text
- Text treatment of body text
  - Smaller
  - Possibly grey instead of black (or lighter shade of whatever color the header is in)
- Images
  - Include more than one on content pages if the text goes down the page
  - If only one image on each page, make the text scroll within the fixed box
